

SUPPLEMENTAL INSTRUCTIONS FOR DRAIN PLUG DE-ICERS

MODEL DPH-15 RUBBERMAID DRAIN PLUG DE-ICER

INSTALLATION INSTRUCTIONS

1. Unscrew plastic nut on the outside of the tank. Remove entire drain plug assembly and save for future use.
2. Place one washer over the cord and onto the threaded flange. Route the supply cord and threaded flange through the hole from the inside of the tank. Place remaining washer over cord and onto the threaded flange.
3. Secure De-icer to tank with plastic nut. Hand tighten until snug. Do not over tighten.

SUPPLEMENTAL INSTRUCTIONS FOR DRAIN PLUG DE-ICERS

MODEL UPH-15 UNIVERSAL DRAIN PLUG DE-ICER

INSTALLATION INSTRUCTIONS

1. Remove drain plug assembly or drain plug from outside of tank and save for future use.
2. Route the supply cord and threaded flange from inside the tank through the drain plug opening. The attached black rubber washer should be on the inside of the tank.
3. Align the de-icer with the heating element facing upward as shown in the picture below. Also, take note of UP Arrow on the unit.
4. While holding the de-icer in place on the inside of the tank, place the notched out black plastic nut onto the threads of the de-icer and hand tighten until snug. Do not over tighten.
